

Disposable Smoothbore Breathing Circuits

GENTEC® Smoothbore breathing circuits are glass smooth on the inside, which provides unhindered airflow. The corrugated exterior with exceptional kink resistance design ensures an extra layer of protection and convenience to the patient.

Features

- Smoothbore interior to offer quiet passage of airflow even at high flow rates. No internal corrugates for condensate to collect.
- Single patient use, conforms to ISO10993-1 and ISO5356-1
- Unique spiral tube body design to prevent choking due to twisting
- Available in Adult and Child models
- Optional accessories including HME Filter, gas sampling line, and various type of connectors
- Customizable length are available upon request
